

ClinicOne 39 Addons - Specifications and Features

clinic_base

Core foundation module: defines abstract models, mixins (company, audit, sequence), and basic data structures.

clinic_staff

Manage clinic employees, roles, departments, and internal user linkage with Odoo HR base.

clinic_doctor

Doctor registry, specialization, licensing, and schedule management with integration to booking.

clinic_patient

Patient registry, demographics, allergies, medical history, and linkage to encounters and billing.

clinic_treatment_catalog

Central catalog of treatments, procedures, pricing, and service duration templates.

clinic_inventory

Manages consumables, medications, and clinical equipment integrated with stock and billing.

clinic_booking

Handles patient appointments, scheduling, rescheduling, and linking patients with doctors.

clinic_queue_room

Manages real-time patient queues and room allocations across departments.

clinic_room_device

Registers and manages clinic rooms, devices, and medical equipment usage tracking.

clinic_triage_vitals

Captures patient vitals, symptoms, and triage information before doctor encounters.

clinic_consent_legal

Handles informed consent and digital signatures for treatments and procedures.

clinic_encounter

Core clinical module for SOAP notes, medical assessments, and clinical documentation.

clinic_emar

Electronic Medication Administration Record and prescription management integrated with inventory.

clinic_imaging

Manages before/after photos, tagging, and linking clinical images to patient encounters.

clinic_care_plan

Treatment plan and care pathway management with multi-session follow-up tracking.

clinic_package

Creates bundled treatment packages with pricing and scheduling integration.

clinic_membership

Manages patient memberships, loyalty benefits, and treatment discounts.

clinic_billing

Generates invoices automatically from treatments and encounters.

clinic_ar

Manages accounts receivable, patient payments, and outstanding balances.

clinic_ap

Tracks accounts payable, supplier invoices, and payment status.

clinic_wallet

Implements patient prepaid wallet and top-up system with balance tracking.

clinic_finance

Handles cash management, journals, and internal clinic financial operations.

clinic_accounting

Integrates clinic finance with accounting ledgers, journal entries, and reports.

clinic_l10n_id

Localizes system for Indonesia, adds PPN, tax reports, and invoice numbering rules.

clinic_insurance_authorization

Handles insurance policies, pre-authorization, and claim processing.

clinic_post_care_followup

Manages post-treatment care instructions and automated patient follow-up reminders.

clinic_feedback

Collects patient feedback and satisfaction surveys with escalation workflow.

clinic_reports

Central reporting engine for financial, operational, and clinical reports.

clinic_dashboard

Interactive dashboards for KPIs, revenue, performance, and room utilization.

clinic_ecommerce

Integrates clinic services with online storefront and payment gateway.

clinic_portal

Provides web portal for patients to view bookings, invoices, and treatment history.

clinic_marketing

Manages campaigns, promotions, and communication with patients via email/WhatsApp.

clinic_telemedicine_secure_messaging

Teleconsultation and secure doctor-patient chat system with file sharing.

clinic_incident_event

Logs adverse events, clinical incidents, and corrective actions for compliance.

clinic_quality

Documents standard operating procedures and compliance quality checks.

clinic_branch

Supports multi-branch and franchise management with separate data segregation.

clinic_integration_api

REST API layer for third-party integration such as mobile apps and WhatsApp gateways.

clinic_audit

Tracks all create/update/delete activities for regulatory and compliance audits.

clinic_analytics

Predictive analytics and AI-driven dashboards for revenue and retention forecasting.
